I N T R O

The idea of The Silk Streets was inspired by the ancient history of “Silk Road Trading”, a network of trade routes which connected the East and West, and was central to the economic, cultural, political, and religious interactions between these regions from the 2nd century BCE to the 18th century.

The vast networks in The Silk Streets carries more than just merchandise and precious commodities. However, the constant trading and interaction also brings about the transmission of knowledge, ideas and cultures.

The users in The Silk Streets will not only be attracted by the trade, but also the continuous and widespread of intellectual and cultural exchange, at the same time, with the most transparent, convenient and advanced blockchain technologies.

BLOCKCHAIN X STREET CULTURE

How is Blockchain evolving?

The internet connected people all over the world through the few touches from the fingertips. Blockchain technology revolutionizes that world through various technological advantages and capabilities.

Transaction speeds, energy efficiency, and network overload problems now does not hinder companies to integrate blockchain technology into their businesses. Therefore initially, blockchain technology was thought to revolutionize the financial industry by decentralizing financial institutions, preventing fraudulent activities, and providing faster international payments. Now, the technology's adaptability in multiple industry sectors is utterly amazing. The street fashion industry is no exception from blockchain implementation.

STATICS

Can you get limited sneakers by yourself?

Price raises due to limited quantity

Spend more to get from reseller

“The Jordan brand, on a wholesale equivalent basis, just earned its first \$1 billion quarter,”
- Nike CEO Mark Parker said on a call with investors Dec. 19.

GAME CHANGER

How does Silk Streets change the game?

ECOSYSTEM

TRADER AND VERIFIED TRADESMAN

Everyone can be merchant in The Silk Streets. Users may start selling once their merchant registration is approved. Product listing may be any brands but only related to street fashion are allowed.

“Trader” could be any registered merchant in The Silk Streets. However, their authentication of merchandise is yet to be confirmed unless the item was requested to be checked by our professional team. Users may rate and leave review for Traders once every purchase is made. By maintaining excellent reviews and high rating for a specified period, Traders will be verified by our team and upgraded as “Verified Tradesman”

“Verified Tradesman” are trusted and experienced merchant who invited to join by our end. Sourcing from the world’s premium boutiques and retailers, as well as our trusted network of resellers, they only sell authentic products. Legal actions and penalty can be occurred if there is any authentication issue with their listed products.

AUTHENTICATION CHECK SERVICE

To ensure the authentication of listed products, users may request authentication check service provided by our professional team. All resale products are verified by a combination of machine learning technology as well as in-hand verification to ensure the product is both authentic and as described.

To support our verification process, we have logged hundreds of thousands of data points on our products to help define their authenticity. Our specialists go through rigorous training and inspect everything from the label to stitching, texture to color, and so much more.

VIP SERVICES

By joining as our VIP Members, users may place their order directly through our professional team to secure their pre-order slots for limited edition items.

As the value of Silk Coin raises, VIPs can spend lesser for same value goods compared to traditional currencies.

VIPs may also earn up to 10% rebates with points earned and stay up-to-date with our exclusive VIP promotions and events.

TOKEN TECHNOLOGY

Silk Coin is a decentralized, peer-to-peer cryptocurrency system designed to allow online users to process transactions through digital units of exchange called Silk Coin (SLKC).

ERC20

Silk Coin blockchain is based on the ERC20 blockchain. Instead of focusing on developing a private blockchain like many other companies. Silk Coin project thought differently. By having a foundation on an already existing blockchain eco-system, the decentralized nature of crypto SLKC is in creating a business model that bridges the gap of trust in using the technology as well customize the chain to fit with our needs.

Silk Coin can not only be used for trading on exchange platforms as an investment, but a currency to purchase merchandises on The Silk Marketplace and a payment for VIP services available on The Silk Streets.

ASSET MANAGEMENT

Example, on March our profit is 1 million, we'll take 25% from our profit for bonus sharing and token burning. For the first 20% we'll airdrop to our investors, 4% will reward to our VIP community, 1% will be directly burn from our system.

SNEAKERS TOKENIZATION

How does it works?

We turn a pair of sneaker into Token, example: Adidas Yeezy launch on 13/4, we will organize an event of voting for this pair of sneakers, the retail price is 250\$, resell price is 500\$ because of this function is open to public so we have to launch it nearly resell price. 1 YZY token= 400\$, we are voting for 100 pairs, so is 40,000\$, 1 SLKC = 0.5\$, our targeting volume of voting is 80,000 SLKC. Every user only allowed to purchase 1 YZY token maximum. When the vote is end, every user will received amount of token they purchase, user can use this token to redeem Yeezy at our platform, this token will be listing on decentralize exchange allow user to trade by using YZY/SLKC pairs. When we received any redeem from user, the YZY token will be burned automatically. This event only accept SLKC as voting currency.

COIN ALLOCATION

Project Funds secured through pre-sale are used for system development and operation business development and strategic investment, market and cooperated partnership service marketing and promotions.
